

The Only Effective Idealism

The only valid political alternative to the destructiveness of materialism, consumerism, greed and corruption is authentic spirituality. We cannot fight these destructive materialistic tendencies with only further materialism, such as with the failed ideologies of Marxism, atheism, capitalism, and socialism. To do so is like attempting to stop a fire by hurling matches into it. We cannot fight the ravages of materialism with yet more materialism, but only with spirituality. Spirituality is the only effective and true idealism of our age.
