

Prosperity Without Pain

The science of Natural Law economics is thoroughly opposed to both dysfunctional extremes of Socialism and Capitalism. Both of these inherently flawed systems have arisen as a direct result of materialism, selfishness, envy and greed. Both systems exalt the importance of quantitative acquirement over the inherent qualities of human dignity and spiritual value. Both systems have dehumanized the individual person, and have turned the natural beauty and inherent value of the Earth into a devalued and lifeless commodity designed merely for selfish exploitation. Natural Law (Dharma) offers us an economic system that simultaneously values both the freedom of the market, as well as social justice for all citizens. This is the only viable alternative to such reckless economic materialism. Reject Socialism and Capitalism as failed materialistic systems. Natural Law is the only effective path to just and meaningful prosperity.
